

This document is intended as a helper document to set up the talk-to-me stack for local testing.

Prerequisites

- Docker Desktop
- GitHub account
- node 12+, npm

Backend

1. Clone <https://github.com/talk-with-me/talk-to-me-backend>
2. `docker-compose up --build` downloads dependencies and builds the app.
3. Navigate to `http://127.0.0.1:8000` to hit the backend. (debug only)
4. Navigate to `http://127.0.0.1:58081` to explore the database (mongo-express).

Frontend

1. Clone <https://github.com/talk-with-me/talk-to-me-frontend>
2. `npm i` to install dependencies
3. `ng serve`
4. Make sure the backend is also running, and the site will be available at `http://127.0.0.1:4200`

TLDR

```
git clone https://github.com/talk-with-me/talk-to-me-backend.git
cd talk-to-me-backend
docker-compose up --build
```

```
git clone https://github.com/talk-with-me/talk-to-me-frontend.git
cd talk-to-me-frontend
npm i
ng serve
```
