As a user, I want to be able to report people that send offensive messages, so I don't chat with them again.			Make a report button on the site that opens report UI	11/12
			Make a report UI for the reporter to describe report	11/13
			Send reports to server	11/13
	Only delete messages when both users disconnect			
		Clone reported conversation into another collection		
		Store reports and reported messages (and link them)		
As a site admin, I want to be able to view reported messages, so I can view reports.	Make sure all devs have DB access			
	Create documentation so devs can know how to access DB			
As a site admin, I want to be able to block IPs/users from chatting, so I can prevent trolls.	Store banned users			
	Be able to mark users as banned in the DB (docs)			
	Have mm algorithm place banned users into 'banned' queue			
	Throw banned users into a forever queue loop			
	Investigate having a user chat with a bot (server replies over ws - stretch goal)			
As a user, I want the background of the website to change occasionally, so that it doesn't get stale and continues to look nice.	Get random images from some random image source			
	Display those images			
As a user, I want to use this website on my phone/tablet/etc., so that I can use it wherever I want.	Learning spike: Decide on how to do responsive design (CSS, breakpoints, grid, etc?)			
	Implement responsive design
